How to Order. Remember It is easy to make mistakes, and guard against them by systematically following these rules:

Address Letter Carefully. State what you want by Name and Number in Catalogue. Don't make clippings. State How Much you Enclose. Don't Forget to Add Postage. Sign Your Full Name and Address, Town, County and State.

If you want to make a complaint, or ask a question, write on a separate sheet as it goes in a separate department from your order.

How to Remit. This may be done in any of the following ways:—

1. **CASH**, in bills or silver; Silver should be well wrapped to prevent cutting through envelope; small amounts need not be REGISTERED which cost 8c.

2. **POST OFFICE MONEY ORDERS** are now very cheap and are SAFEST.

3. **Drafts on N. Y.** can be bought at any bank; Private Checks will be accepted, but your order must be kept until they are paid. So don't send them unless certified.

4. **Postage Stamps** will be taken for sums under \$1.00, but we don't like them; in warm weather lay paper between to prevent sticking.

Mutilated Coin is worth its weight as old Silver ONLY, which is little over one-half. DON'T SEND IT—but if you do, SEND ENOUGH. We will not take it at face value.

Private Checks. As stated elsewhere we do not receive private checks as cash; we have so many returned marked "N.G." that we are obliged to make this rule invariable. If you Send an Uncertified Check we must Hold your Order until it has been Cash'd. To save this delay make your remittance in other form.

Terms. Our Terms are simply CASH WITH ORDER "F.O.B.N.Y." We deliver goods to your order here in the city either to Post Office, Express or Freight Company, and there our responsibility ceases. We give no credit, pay no postage, nor freight, except in a few cases where mentioned in catalogue. We do not send goods C.O.D. unless one fourth the amount is sent to guarantee charges.

Postage Stamps. we will accept them for small amounts (under \$1.00) and where Money Orders are not Obtainable. But they must reach us in perfect condition; 1 and 2 cent denominations preferred. If you can get Money Orders either P.O. or Express, please do it as it is safer for you and suits us much better. Many small lots of stamps make a large lot, and \$5,000 worth (which we frequently accumulate,) are not easy to "work off" even at a discount.

HOW TO HAVE GOODS SHIPPED. We do not deliver Goods Free. Our prices are "free on board" here. Please bear this in mind when ordering. We constantly receive small orders which we know our customers do not expect to receive by express though they give no shipping directions nor enclose postage. Where we consider it practicable or economical to mail goods we give the amount of postage required on each piece under each article and this amount must be included with your remittance, otherwise we are compelled to write for it, thus delaying your shipment. Where goods are not to be mailed it is well to order them shipped "by cheapest way" which our clerks can readily determine.

THE MAILS are a great convenience but are too expensive on many goods. We do not wish to have you save 25 per cent on a purchase and lose a large part of it in costly transportation—and therefore advise you to avoid the mails as much as possible by ordering a quantity of goods by freight or express. We do not guarantee the safe delivery of goods sent by mail. We pack properly and deliver to post office; there our responsibility ceases. In case of loss we do all in our power to recover the package. There is probably not a loss of one per cent on mail packages. Valuable packages may be registered for 8 cents.

Prepaid Express. All the leading Express Companies forward packages if prepaid at a special rate of 15c. for any package weighing 15 oz. or under and 1 cent for each extra oz. to all points East of the Mississippi. They also carry BOOKS and other 3rd-class postal matter under same conditions at 10c. for first 1½ lbs. or less and 1c. for each added 2 ounces. While this is no cheaper than mail rates we recommend it, as it is much safer.

We insure the safe delivery of mail packages at the rate of 10c. for goods valued under \$5.00 and 15c. for \$5.00 to \$10.00. To those who do not wish to run any risk this is a satisfactory method.

Errors and Omissions.

Mistakes will happen. We employ skilled people in order to minimize them, but still they occur; if you do not get goods promptly or get unsatisfactory goods, write us; don't "kkek" any more than you must but any way write and when you write, be sure and state the facts, viz: When you ordered; how much you sent and in what form, cash, stamps, etc.; what you ordered. Your complaint will then have prompt attention.

"C. O. D." There are advantages and disadvantages in sending goods C. O. D.—You do not have to pay for them till you get them (and see them if you wish), but you have to pay charges for returning the money to us.—We guarantee all goods to be as REPRESENTED and as you get to know us you will avoid this useless expense.

DON'T ASK FOR CREDIT, The key note of our plan is spelled thus C-A-S-H—we pay cash to get low prices and must GET cash to PAY—were we to do a credit business as most merchants do, we would be compelled to add 10 to 25 per cent to our prices. See?

NOT A PURCHASING AGENCY. We don't send out for the goods when we get an order and perhaps get something else "just as good"—but different; before listing an article we have a good stock of it on our shelves so that we not only know we can fill your order with the exact thing we advertise, but we can do it at once; many think from the magnitude of our list that we can't have everything in stock; a walk of a half mile through our ten immense floors would show every item in this book in generous quantities.

NOT AN AGENTS' SUPPLY HOUSE.

We are the Agents. That is, we are the only link between you and the manufacturer. We never buy of jobbers but always of the maker. We don't refuse "agents'" orders and call their attention to the wholesale prices we quote, which are as low as those of regular jobbers; but our aim is to supply consumers at prices agents, storekeepers and "the trade" in general pay.

WE DO NOT PAY POSTAGE or Express-ago except

In a few cases where it so mentioned in connection with article. Where goods may be mailed economically and safely we give the amount of postage required which must be always added to price.

Hand It Along.

Sometimes more than one of our catalogues may fall into your hands. If so, you will do us a great favor to hand the extra one to a friend with such remark as you see fit to make. It should not be wasted—it's too good.

We Guarantee all goods bought of us to be exactly as represented herein. Your money back if they prove otherwise.

Our Addresses

are never sold to Quack Doctors, Patent Medicine Men, Fakirs or Schemers, as other Mail Order Houses do. Mothers can feel assured that their children will not be in receipt of obnoxious and dangerous reading matter now flooding the mails, as their addresses are never sold by us.

Hundreds of letters are received daily by us asking numerous questions about our goods, but never enclosing a two-cent stamp for reply. The amount expended each year in answering these letters is very great, and hereafter to insure a reply, customers must always enclose a 2-cent stamp

SPECIAL INDUCEMENTS!

In addition to the bed-rock prices quoted in "OUR SALESMAN," we offer further extraordinary inducements for QUANTITY ORDERS. There is absolutely no profit in small mail orders, and to pointedly call our patrons' attention to this fact and secure an increased proportion of profitable orders, we make the following very liberal premium offers:

PREMIUM NO. 1. FOR 50C. TO \$1.00 ORDERS.—A fine GOLD PLATED RING, the usual retail value of which is..... **15C**

PREMIUM NO. 2 For \$1.00 to \$2.00 ORDERS. An elegant ALASKA DIAMOND SCARF PIN. Never sold at less than 50c. and frequently..... **\$1.00**

PREMIUM NO. 3. For \$2.00 to \$5.00 ORDERS. An exquisite set of FOUR SILVER and GOLD PLATED STICK PINS of new and novel design; worth at least..... **40C**

PREMIUM NO. 4. For ORDERS OF \$5.00 AND OVER. A set of best SOLID STERLING SILVER DUMB-BELL CUFF BUTTONS, of latest design and perfect workmanship. Lowest retail value..... **\$1.00**

These premiums are NOT given where CASH DISCOUNTS are taken.

In ordering state the number of Premium claimed. These Premiums are made very attractive and will be found fully equal to representations, and are well worth expanding your order to obtain.

CASH DISCOUNTS. It is obvious that on large purchases our expense of handling an order is less. We will give you the benefit, allowing you a discount according to the amount of your purchase, as follows:

\$5 to \$10.....	3 Per Cent.
10 to 20.....	4 Per Cent.
20 to 50.....	5 Per Cent.
50 and Higher.....	6 Per Cent.

This is a large discount on goods sold as closely as ours, and is only allowed when cash comes with order. You will find it profitable to "club" with your neighbors in ordering, thus obtaining a larger discount and cheaper transportation.

Note.—This discount is not allowed in addition to any premium or combination offer.

Read Our Prices!

You may think this Salesman just like its predecessors—a sort of old story, and throw it aside. BUT DON'T! There are changes. Many new goods are offered; many many new prices are quoted. When we look at some of our old prices we are almost ashamed as they are 3, 4 and sometimes 10 times higher than now, but it's all right. Simply mercantile evolution—and the game is still on—AND YOU WANT TO WATCH IT! Read our prices.

Special Note.

While prices are being advanced all along the line of imported goods, we call our customers' attention to the fact that in no case have we raised a price and in scores of cases, lowered them—and for the present will not do so.

"Special" Prices for "Special" Reasons.

When we get a way inside price from a manufacturer; when we have something we are particularly anxious to push along; when we have a heavier stock than our trade will absorb promptly, then we put the word "Special" before our dozen price and after that word we put figures worthy your attention. They are manufacturers' jobbing figures.

References.

If you have access to Dun's or Bradstreet's Mercantile Reports you will find us well rated therein. Any wholesale house or bank in this city will speak well of us. We could fill volumes with flattering testimonials from nearly every city and town, but after all is said, the proof of the pudding is only in the eating. Send us a trial order and let our goods testify for us. We occupy 10 immense floors at this address where we sell all the goods advertised. At Linden, N.J., we have one of the finest factories in the country where 200 to 300 hands are employed making our peerless specialties. At Waterbury, Conn., our watch factory employs over 500 people, producing our cheapest American Watches. In fact, everything is complete to enable us to carry out our plan of producing the best goods at lowest cost and placing them directly in the hands of the consumer without the intervention of profit absorbing middle-men.

NOTICE THE DIFFERENCE.

Two-Piece Crank Hanger and other important features make it practically an 1899 wheel; the other kind have as a rule been made up for a year or two, or if recently built it is from old style material, of inferior quality at that.

Between the Ingersoll and the usual low-priced wheel. The Ingersoll is red-hot from an up-to-date factory. It embodies every late idea in Bicycle construction. Its Flush Joints, Low Drop

Why Ingersoll Wheels Beat the World!

We have hundreds of times been asked by those who know our extraordinary facilities for producing things cheaply and marketing them direct to the consumer in immense quantities, why we have not before this commenced the **Manufacture of Bicycles.** To this we have replied that the time was not yet ripe for making wheels at **Popular Prices** and until we could do this we would **Stay out.** NOW the Time IS Ripe and we have **GONE IN** body and soul, and we are showing what may be done under **favorable circumstances.** We have for years done the largest jobbing business of any house in the world in **Bicycle Parts and Fittings.** We have also been manufacturing many of the most important parts. We have made alliances with all the largest producers which gives us the **Inside Track**—inside even of the largest wheel makers of the world. **Makers of Steel Tubing, Cranks, Sprockets, Chains, Pedals, Etc.,** whose whole product in many cases we have bought for cash during several years, naturally give us lowest possible prices and choicest goods.

Another Point. Bicycle Manufacture has undergone a revolution in the past few years and largely within a short time. Two or three years ago wheels were made cheapest in the largest factories where every part was made and nothing bought outside, the largest factories even producing their own tubing and tires. Being thus strongly entrenched, these large monopolies charged excessive prices and "held prices up" (and held the public up.) But in this great country such conditions are not long possible. Thousands of bright, active men and concerns saw the game and almost simultaneously they started to beat it. Men with a few thousand dollars knew they could make wheels if they could get "parts" and progressive manufacturers knew they could make parts if an outlet could be found for them. We knew all these people and helped bring them together and the result is that to-day there are a thousand makers of a few wheels per week instead of a few making a thousand wheels per week and the big monopolies are "suing for peace" and trying to find out how **THEY can Compete** with the **SMALL Wheel Builders.** Many of them have failed, others have closed down, some are buying parts and competing and some are going on and losing some of the millions they have made.

As to Ourselves. We occupy a position which is out of the dilemma. The large makers can't touch us for reasons stated above. The small ones can't because we are the people who sell them the parts at a profit which they have to add to the price of the wheels. We make or buy the parts at very near the original cost to produce in immense lots by factories which do nothing else and can therefore make them at the lowest possible price. Our Brazing, Enamelling, Plating and Assembling rooms are the largest and best equipped in the country. They contain every modern appliance for building the finest wheels at the lowest price.

Our Assembling Perfect.

In our wheels we have not only given closest attention to the selection of the best and most approved style of parts but also to their relation to each other and the assembling of them to produce wheels of the highest running type. The running gear of a wheel is its vital feature and it involves not only perfect parts but the assembling of them in perfect relation to each other. In this our wheels are equal to the best.

No Fancy Price. When you buy one of the "Standard" make of wheels you pay at least 1/2 of your money for advertising, "name" and expensive paraphernalia of large concerns. When you buy an Ingersoll Wheel you pay only for what you get. You pay the original manufacturers cost of the parts, bought in immense quantities, you pay for building and finishing the wheel a price not exceeding \$3.00 or \$4.00, which includes our profit. In fact you almost get the wheel for the bare price of the material in it.

Our Triple Guarantee.

Besides the Guarantee adopted by the Association of Cycle Manufacturers, the same as is given with all the best and leading wheels, we personally guarantee each and every wheel of our manufacture to be free from defects in material and workmanship. We further guarantee entire satisfaction and will promptly refund your money if you do not find our wheels the greatest value you have ever known.

Ladies' Models. It is the practice with "old line" makers and dealers to offer Ladies' wheels at same price as Mens'. This is because their profits are large enough to cover extra cost of Ladies. The construction of frame, addition of chain and mud guards and brake make the cost to manufacture several dollars greater and this extra cost the buyer must pay when wheels are sold on our plan of one small profit. Many lady riders are dispensing with brake; also chain guard. Our price for either model with chain and mud guard is \$2.50 extra; with brake \$2.00 extra; with mud guard only \$1.00 extra.

Special Proposition. We know that Seeing is Believing and Believing is Buying and we are perfectly willing to offer every chance to you for the closest inspection before you pay your money. So if you will **SEND US \$1.00** as a guarantee of good faith, we will ship our **SEND** wheel securely crated complete and accompanied with our unparalleled signed Guarantee. If on receipt of wheel you find it what you expect you pay the balance of price (after deducting the \$1.00 paid) and keep it. If for any reason you do not want the wheel the Express agent will return it at our expense.

MODEL A.

SPECIFICATIONS.

FIRST. The "Ingersoll" Model A is the latest 1898 Model produced; in fact it might be called an 1899 Model, as we think we have, from our knowledge of the most advanced ideas, anticipated the 1899 requirements almost exactly. While other makers, especially of low-priced wheels find it necessary to use old-style parts to a great extent, we have no reason for using anything but the very latest products. **FRAME.** Made of best Seamless Drawn Steel Tubing. Ingersoll Flush Joints throughout. This important 1898 feature is only found in wheels of the highest grade; these joints are not only far the strongest because a perfect weld cannot be had with the old style outside joint, but also far handsomer; when finished the frame shows no break at the joints as the lugs and tubing are exactly the same diameter; neatness and strength are results of using these joints. 1 1/2 in. Head; 1 1/2 in. Upper and Lower Bar and Seat Post Mast; Lower Rear Forks, 2, D Style, Tapered to 1/2 in.; Upper Rear Forks, 1/2 in., Tapered to 3/8 in. Fitted with Arch Braces. Height of Frames: 20 1/2 in. with 3 1/2 in. Head; 22 in. with 5 in. Head; 24 in. with 7 in. Head. **ARCH CROWN.** Neatest, strongest and lightest made. Drop forged from carefully selected steel; accurately machined and with ends set in fork sides 1 1/4 inch, the only crown now used in high grade wheels. **CRANK HANGER.** The famous Fauber Pattern (One-piece), with diamond shape steel cranks both in one piece of steel, including the axle, the highest grade hanger in the market. No Cotter Pins; simplest and most durable. **SPROCKETS AND GEARS.** We furnish all gear using 7, 8, 9 or 10 teeth on hubs, with 22, 24, 26, 28, 30 or 32 tooth sprocket on hanger. In this variety of sizes it is possible for us to suit the most varied ideas of riders. **CHAIN.** Humber pattern with hardened parts throughout; each chain is tested before leaving factory and will not stretch. Finished with Blue Sides and Straw colored ground, polished. **PEALS.** Are of neat design; the Side Blades are made from Blade Steel; Cups and Cones turned from tool steel, hardened and ground. Axles are carefully hardened, a very important item in pedals. **HUBS.** Special design and accuracy make them practically hard proof, they have no felt washers or other make-shifts designed to exclude dust, but they have the finest material and workmanship of any hub made. Large barrel pattern, turned from solid steel; cups and cones are turned with greatest accuracy, hardened and ground. **WHEELS.** Finest Mahogany finished and gold striped rims. Excelsior Swaged Spokes, heavily nickled. Built up perfectly tight and true. **TIRES.** At the price we cannot give full option on tires owing to the fancy prices asked for some of the leading makes. Our tires are however, first class in every point, and the same guarantee is given with them as with M. & W., Vim, or Hartford, (which, if required, we supply for \$2.00 extra.) The option we give is the "Indiana," made by Indiana Rubber Co., Indianapolis, or "Globe," by Globe Rubber Co., Trenton. **SADDLE.** The Ingersoll Saddle is specially made for our wheel; Brown Model, combination, padded, high quality. **SEAT POST.** Forward L Shape bringing rider over pedals, the correct riding form. **HANDLE BARS.** Best steel, heaviest nickel plate; shapes either up or down turned Rams-horn or V shape with 6 or 8 in. drop. **FINISH and COLORS.** Fork is nickled complete. Frame has 3 coats of enamel, the finest enamel finish ever produced on a wheel; Gold Striped; Colors: Ingersoll Green—a dark Olive, or Black. The former is sent unless specified. REVOLVING SHIRT BOSOM.

The latest and most startling novelty, scoring everywhere a record breaking success, and causing endless fun and roars of laughter wherever introduced. Take a look at the illustrations and see why Cholly is so happy; it won't be necessary to tell you that he wears one of our Revolving Shirt Bosoms and not only has the laugh on the Chinaman, but on his many rivals who can't understand how he can afford a new shirt every day. It's simple and cheap when you know how, and here

it is. Our Revolving Shirt Bosoms are the only ones on the market with a high finish and open fronts—therefore the only true imitation of the regular shirt. No. 2, Full dress shirt, plain or with motto (see cut). No. 3, Very attractive plaid, will draw attention everywhere—to be worn on race tracks, fairs, etc. No. 4, Red hot—to comical for anything, success on the stage assured—something for the "boys." OUR WONDERFUL METEOR BALLOONS.

We offer something entirely new in Balloons. There is nothing quite so fascinating to old or young as watching the airy flight of a balloon, and a foreign inventor has just gotten a patent on a new idea in paper balloons. They rise from a table in the house or ascend heavenward in the open air. They excite the greatest curiosity everywhere they are shown, and thousands are now sold daily in Europe. Our foreign representative saw them in London and sent a large invoice across the Atlantic, so we could be the first to advertise them in America. Our cut above shows them in their flight, and as they burst and drop bright star-like orbs slowly to the ground. Positively no danger of any kind connected with them. In packages of 10 balloons. Postage 1c. on 20. Price 10c. package; \$1.00 Doz.

X RAY WONDER TUBE.

Price 10c. Each; \$1.06 Dozen.

The Wonder Tube is a wonderful toy which affords and creates astonishment among young and old. It shows the bones of the hand, the lead in a pencil, the hole through a pipe stem, etc. etc. It is a baffler to all, and we defy any one to give any explanation of it without taking the instrument apart, and this will disclose something beyond the power of man to reproduce. In using the Wonder Tube place it to the eye as shown in cut and look toward a window or other strong light (daylight is better than artificial light); then hold the fingers in front of the instrument, spread them apart, moving them backward and forward until the proper focus is obtained, when you will have the identical appearance shown by the Roentgen Rays. Postage 1c.

ROOSEVELT WHISTLE.

See this ghastly grin! We have them to sell. All you need to do to give yourself not only the greatest smile ever produced, but also the greatest horse-laugh, is to buy a Roosevelt Whistle. It is a very ingenious invention from every standpoint. The mouth is so splendidly executed that it has the exact appearance of those one sees in life but once in years. It fits the face so perfectly that close inspection is necessary to see that it is not your own. The coloring and formation of lips, gums and teeth is so perfect that the illusion is complete. Attached to the back is a noise-making device which does actually "beat the band." It will give you a hilarious demoniac laugh, a roar like a sea-lion, a bark, whine or cry,—anything you like, in fact. This novelty can't be beaten for a fun maker. Postage 2c.

Price 9c. Each; 90c. Doz.

RABBIT'S FOOT MASCOT.

The highest honors ever reached by man have been attributed to carrying this wonderful mascot, and while we can't guarantee a similar result in the case of every one who will carry one persistently, we are told there is a whole lot of general good luck in it, such as immunity from sickness, ill-fortune, success in love, business or any other undertaking. This is an old-time mascot, and we have gotten it up in a neat and popular form, so it will have the widest possible effect on the fortunes of the masses. Guaranteed a genuine rabbit's foot, size of cut; has eye screw anchored in the bone for attaching to watch chain if desired; also neat, nickel cap piece. Postage 1c. Price 8c. Each; Special 75c. Doz.

THE SURPRISE BOUQUET.

Fun for the Million and Rare Sport for the Practical Joker!—A pleasing novelty and the best practical joke of the season. This beautiful button-hole bouquet is made of artificial flowers and leaves, which so closely resemble natural flowers and leaves that not one person in a thousand would detect the difference. After placing the bouquet in your buttonhole, you call the attention of your friend to its beauty fragrance. He will very naturally step forward and smell of it, when to its utter astonishment, a fine stream of water will be thrown into his face. Where the water comes from is a mystery, as you can have your hands at your sides, in your pockets, or behind you, and not touch the bouquet in any manner. You can give one dozen or more persons a shower bath without removing the bouquet from your buttonhole, and after the water is exhausted it can be immediately refilled without removing it from your coat. Cologne can be used in place of water when desired. We have many funny things in our stock, but nothing that equals this. Each bouquet in a beautiful box with full printed instructions. Price, all complete, only 20 cents.

THE COMICAL MIRROR.

A handsome convex mirror in a case suitable for carrying in the pocket. For many years the large convex mirrors in which a person appears drawn out as long and narrow as a bean pole, or flattened down like a gridiron with a face as broad as a cellar door. This mirror produces the same effect as the large and expensive mirrors in the museums. By holding the mirror in an upright position stout people look thin, and in a horizontal position thin people look stout; any one can recognize themselves at once, but their features are so distorted and their general appearance so changed that they cannot fail to have a good laugh over it. If you have a friend (lady or gentleman) who think they are a little better looking than any one else, let them take a peep into the mirror and it will take them down a peg or two—either the "short and fat" view or the "long and slim" view are stunners and will cure the blues every time. Send for one it will afford you lots of fun. Postage 2c. Price 6c. Each; 65c. Dozen.

"slim" view are stunners and will cure the blues every time. Send for one it will afford you lots of fun. Postage 2c. Price 6c. Each; 65c. Dozen.

TRICK FINGER.

This is a most wonderful feat of prestidigitation, performed every day on the stage by men like Keller and Herrman. A hat is borrowed and after being shown to your audience to assure them that it is in perfect order, you (apparently) coolly jab your finger through the crown. The owner of course protests, but all you have to do is to keep out of his reach a moment when you can hand back the hat in perfect order. The finger consists of a piece of flesh colored rubber, moulded in perfect imitation of a fore-finger including nails, knuckles, lines and other characteristics; in the end is a needle which by a quick movement you insert in the crown. Postage 1c. Price 6c. Each; 65c. Dozen.

BICYCLE PUZZLE.

This is an up-to-date puzzle, which is not only a test of nerves and skill, but especially of ingenuity. It is a perfect miniature of a bicycle wheel, hub, spokes, rim and pneumatic rubber tire. (As a house ornament and novelty it is worth more than its price.) On each spoke is a movable metal ball, and the object is to get the balls from their positions against the rim, as shown in cut, into their proper places around the hub. This requires no end of coaxing and patient labor, as while you are endeavoring to run the last delinquent in, three or four others escape. Then to get them back to the rim to the average man is just as difficult; but there is a way to do it easily. Can you find it? Postage 2c. Price 9c. Each; 80c. Doz.

DARKEY SMOKER.

An attractive ornament and useful Disinfectant Holder made entirely of metal, to represent a Dude Darkey smoking his cigarette. Disinfects your room as small sticks of disinfectant are used by the smoker, which he seems to enjoy as much as the genuine article. We call him the Warmest Cogen in Town, and his appearance while smoking certainly warrants the name. Each Darkey is packed in case with 10 sticks of disinfectant. Postage 2c.

Price 9c. Each; 95c. Dozen.

THE CLIMBING MONKEY.

The great success of this year in mechanical novelties. Untold millions have been sold and if we did not know how large the country is, we would think everyone had one. It is a mechanical triumph. To the ordinary observer it may look easy to accomplish, but to make this monkey climb the string, always moving his four limbs exactly true to life and then climb down again, simply by pulling or releasing the string, involves a great deal of mechanism which the inventor spent months in perfecting. The monkey is of decorative metal and about 8 in. long. He climbs as stated above; is strongly made and will not only give intense enjoyment, but last a lifetime. Postage 4c. Price 25c. Each; \$2.60 Doz.

GOBLIN SCARF PIN.

This is one of the few things that lengthens the life of the practical Joker. It is estimated that each preparation of this trick adds 6 months to his allotted time. It is a gold plated pin, the design being a man mostly head and legs. It is so curious in get up that no one can fail to notice and examine it closely as worn on your scarf. At this juncture you pinch a rubber ball concealed in your pocket, which works the "hose," and the little man squirts from his pursed up lips a fine stream of "aqua pura." Postage 2c. Price 2c. Each; \$2.20 Doz.

The many charming effects that may be produced by the use of the above light can be readily appreciated. The battery does not heat up or leak, and can readily be carried in vest pocket. THE X RAY CAMERA.

This wonderful instrument dis- counts in many respects the intricacies of the elaborate and scientific devices of Roentgen and Edison. It is one of the most wonderful of modern sensations. Objects, no matter how dense or thick, placed between its lenses, are as if made of thin air, as the eye penetrates them without the slightest effort. What can be more wonderful than to place your hand, finger, or a piece of wood or heavy metal in this instrument, between the lenses, and then place it to the eye, and instead of the vision being obstructed, as would be the case with any except this instrument, it travels through and beyond the object, as if nothing were there. Of all optical inventions (and there have been a great many), this stands alone as the most wonderful and incomprehensible. The Camera contains two sets of compound lenses, mounted in a handsome telescope case, 3 1/4 inches long. It is being sold by the million in the largest cities at 25 cents. Consistent with our usual custom, we cut the price almost in half and place the wonder within reach of all for a trifle. Postage 2c. Immense Sale

When handed back to the operator it is simply placed upon a chair or table, when it will seemingly become endowed with life and begin to move. At the command of the operator (who may be in any part of the room), it will lie down, stand up, dance, etc. This is similar to the wonderful skeleton used by Professor Pepper in his lectures and exhibitions. MAGIC SPOTS.

This is the most interesting, magnetic and scientific puzzle of the age. It is having an enormous sale in all the principal cities of the world and is creating more comments than any puzzle since "Pigs in Clover." Magic Spots is so different from the usual order of puzzles that groups of men, women and children are often found watching the sensational and magnetic movements of the spots. The puzzle comprises a neat round wooden box with cardboard base, a German horseshoe magnet and a number of small flat

lead spots. The object is to get the Magic Spots directly over the red dots, with the aid of the magnet, from the outside of box. To move them is very easy as the horseshoe is strongly magnetized and attracts the spots instantly, but to place one on each spot requires great nerve and skill, and the length of time it takes to do it depends entirely on the quickness of your hand. It has often been done in a minute and then again has taken over an hour before all were placed; but the queer antics performed by the little spots so engrosses your attention that you hardly notice the passing of time. There is more enjoyment to be had from this puzzle than any other ever invented; you will be mystified at its wonderful magnetic influences and spend many hours in trying to solve it. Postage 1c. Price 9c. Each; 95c. Dozen.

At this command it falls down as flat and as dead as a nail, but let an outsider touch it and it is up like a flash, and he cannot make it lie down. As the bottle is turned out of a solid piece of wood it cannot be broken. Great fun can be had at an evening party or elsewhere, with this trick, which will bear repeating any number of times. Postage 1c. Price 5c. Each; 54c. Doz.

PRAIRIE WHISTLE.

This is one of the most wonderful productions of the artisan's skill, and its effects are simply wonderful. It is a little instrument which is entirely concealed in the month when in use, it being impossible for the closest observer to discover that the person using it has anything unusual in his mouth at all. It is composed of a double semi-circular metallic ring, which encloses and supports the vibratory tissues or sound producer. Attached to the ring is also a diaphragm or retractor, the whole instrument being only about half an inch in length and less than an inch in diameter. All the parts are made by costly machinery, designed expressly for the purpose, and every part is finished in the most perfect and substantial manner, will last a life-time. With it any person can imitate in the most perfect manner the singing of every bird in the forest, the cackling of a hen, the squeal of a pig, the grunt of a hog, the neighing of a horse, the whistling of a quail, the quacking of a duck, etc. For the use of the hunter, they are invaluable, as an animal or bird can be so imitated as to call them at once within range. All the various songs of the mocking bird, canary, and other choice singers can be given so naturally that the most expert listener cannot detect the difference. You can talk as well with it in your mouth as without it. This is the famous genuine double throat or ventriloquist's whistle. Please look in other catalogues and see what awful prices they charge. Postage 1c. Price 3c. Each; 32c. Doz.

MAGIC TRICK WHISTLE.

Did you ever pick up a whistle without blowing it to see how loud it was? Did anyone? No! Whistles are to be blown and everyone knows it. So when they see one they blow, and blow hard. This whistle is just as inviting as any your guileless friend will be sure to blow if you leave it in his way, and what does he get? Instead of noise, flour! and he gets a lot of it in his eyes, nose, hair, on his black suit and shirt front. He gets filled with it, and looks like a ghost or a grist-miller, when it is over and he emerges from the deluge. Postage 1c. Price 9c. Each; 94c. Doz.

TIMBUCTOO SCARF PIN.

This was all the go at the World's Fair in Chicago. The people almost fought to get them. The manufacturer could not make them half fast enough. A Startling and Pleasing Illusion:—"The ways of the world are devious," says Matthew Arnold, but the ways of the Lightning Trick Box, when properly handled, are admitted to be puzzling and uncertain. You take off the lid and show your friends that it is full of nice candy. Replace the lid, when you can solemnly assure your friends that you can instantly empty the box in their presence without opening it. See cuts which show how this illusion appears, and taking off the lid again, sure enough the candy has disappeared. Pharaoh's Serpent's Eggs.

A wonderful and startling novelty! Our illustration gives a very correct idea of this scientific wonder, which has become so famous since its introduction in America. "Pharaoh's Serpents" are produced from a small egg, no larger than a pea. Place one of them on a plate, touch fire to with a common match, and instantly a large serpent, a yard or more in length, slowly uncoils itself from the burning egg. Each serpent assumes a different position. One will appear to be gliding over the ground, with head erect; another will coil itself up, while another will stretch out lazily. Each movement is natural as life. After the egg stops burning the serpent hardens and may be kept as a curiosity. Twelve eggs in wood box. Postage 1c.

THE SMOKERS' CAMERA.

WARBLER SCARF PIN.

"This is a BIRD!" not only in the worn vernacular, but in fact. It is, furthermore, a live bird! At least it has two of the most necessary attributes of one, namely, it sings and flutters its tail. It is beautifully designed and perfectly made by one of the country's leading manufacturing jewelers; elegantly plated in 14-K. gold. Its detail is so fine that each particular feature is brought up by the perfectly engraved dies. This is important, for to get one's attention you must wear something odd, striking and pretty. Your friends will never fail to notice the bird. Then, while they are examining it, you secretly press the rubber bulb concealed in your vest pocket and to the astonishment of all the bird, till then quiet and inanimate, raises its tail, which is of beautiful real feathers, and begins to sing; and as your friend becomes more interested and wondering you vary his singing to suit yourself, from the mild chirrup of a meadow lark to the shrill plaint of a whippoorwill. Imagine the consternation caused by seeing such a performance of an innocent and beautiful Scarf Pin. Last year we were obliged to sell this at 70c. Finding it so popular we contracted for a large lot, and have reduced the price to but little over one-third this amount. It is complete with all fixtures as shown in cut, including ball and about 2 feet of tinsel. If your fancy pleases, you may use water in place of air, and instead of filling the atmosphere with music you fill it with water and spray. A great fun-maker. Get it. Postage 2c. Reduced Price 30c. Each; \$3.10 Doz.

THE SKIRT DANCER PIN.
THE LATEST NOVELTY.

To be Worn in either the Scarf or Lapel of Coat—Kicks like the Original Article. An Attractive Pin.

There is a pneumatic arrangement within the figure which is connected by means of a concealed rubber tube with a small rubber ball carried in the pocket of the wearer. Like Lolie Fuller, you have to reach into your pocket to see her dance. It is only necessary to apply a little pressure to the bulb in the pocket and the skirt dancer's pedal extremity describes arcs in the air with precision enough to destroy a tile at every kick. You press the bulb, she "does a turn." The chief advantage of the small silver Lolie over the other kind lies in the fact that she is perfectly obedient to the stage manager's wishes, and all her kicking is confined to her own line of business. Postage 2c.

Price 23c. Each; \$2.30 Doz.

THE MAGIC BOX.

A beautiful nickel-plated box containing a heavy wheel centered on a shaft, the top end of which is magnetized and projects through top of box; the wheel is set in motion by a lever at side of box, and on account of its weight it runs a long time. The magnetized shaft end of course attracts metal, and when in motion anything placed against it will be kept in constant action, taking courses depending on the shape of the metal applied. Cut shows two figures set on a metal base of irregular shape, which moves the figures exactly as if they were waltzing and reverses them at intervals. With each box comes an assortment of a dozen different figures in beautiful colors, also the same number of metal fixtures of almost every conceivable shape, making the variety of permutations this box will bring out almost endless. It is impossible to adequately describe it. You will be a hundred times satisfied if you send for one. Postage 2c. Price 40c. Each; \$4.00 Doz.

THE WONDERFUL MONEY MAKER.

THE MONEY QUESTION SETTLED AT LAST.

While "Gold Bugs" and "Silver Cranks" are trying to settle their differences on the money question this gentleman says nothing and saws wood. The illustration shows him in his first convulsion of surprise at the result of simply turning the crank. As he turns, the white paper goes in and a crisp new \$5.00 note comes out, and when the last bit of paper disappears between the calendars of the machine the bill drops. A hatful of the same kind follows as you feed in more paper. Transmutation of metals is not in it with the wonderful money maker, as you (apparently) make money with it out of paper costing but 4c. a pound. However it is NOT a counterfeiting machine but the sleekest fooler of the credulous ever devised by ingenious man. Guaranteed to do as claimed above. Substantially made with metal frame on fancy wood base, provided with a supply of blank paper and instructions enabling anyone to work it to perfection. KAZOO, the Musical Wonder.

GREAT FUN FOR THE BOYS! With this wonderful instrument you can play any tune, imitate birds and animals, bag-pipes, Punch and Judy, etc., etc. The Kazoo is the only musical instrument that any one can play at a moment's notice, without instruction. When used by minstrel and specialty artists, quartettes or choruses, it invariably receives repeated encores. Furnishes good dancing music for excursions, picnics, etc. Superior to anything else for clubs, street parades, etc. Used as a mouth-piece on brass or tin horns; a good band can be organized with little practice, as the keys require no fingering.

FAVORABLE NOTICES FROM THE PRESS.

"The popularity of the kazoo as a musical instrument is attested by the fact that kazoo quartettes and choruses are being generally introduced at entertainments. The kazoo quartette at the City Hall entertainment recently was recalled six times, and the kazoo chorus at the Genesee Normal School entertainment received 4 encores."—"Post Express," Rochester, N. Y.
 "A portion of the afternoon's pleasure and amusement was due in no small degree to a small musical instrument called the 'kazoo,' with which the musically inclined gentlemen of the party performed in a creditable manner the popular songs of the day. It was this little instrument that furnished music for the march to the hotel, and if one might judge by the interest taken in it by the guests on the piazza, it fully sustains the reputation of novelty given it by its inventor."—"Boston Journal." Animated Skull Scarf Pin.

This is about the richest novelty ever invented. It is composed of a neatly made and heavily gold-plated skull; Shakespeare tells the rest—And in those holes where eyes did once inhabit there were crept as 'twere in scorn of eyes, reflecting gems, etc." Ingeniously constructed levers and springs inside the skull enable the wearer by means of a fine silk thread running behind the scarf, to make the jaw drop and the diamonds come out and fill the holes; the effect is truly awful; enough to startle the most phlegmatic. Too well made to be very cheap but will yield bushels of fun.

Creates roars of hilarity and never loses its attractiveness or novelty; entirely harmless; will injure none's feelings, but make everyone happy. If you want a novelty to make you remembered, get a good one; this is it. Postage 1c. Price 75c. Each.

THE LITTLE JOKER.

One of Prof. Herrmand's most wonderful little Tricks; with it you can mystify all your friends. Impossible to detect unless you know the secret. One way to show it is to pass the Joker among your friends for examination, then open it yourself, unfolding the pocket inside, showing it to be empty, place a dime in it, fold it up, close the covers and open at once. "Presto change," the coin has vanished; close again and open once more. "Behold" the coin has reappeared. The Little Joker can be used

in several ways, all of them being very mysterious to all except the operator. Postage 1c. Price 7c. Each; 70c. Dozen.

NOVELTY CARD PISTOL.

and girls. The distance a card can be shot with it is beyond belief. It is simple in construction, perfectly harmless and looks much like an ordinary pistol. It will shoot any kind of card; 100 are furnished with each for a starter. Postage 3c. Price 15c.; \$1.50 Doz.

Pacemaker BADGE-PIN.

For cap or lapel. This is the neatest novelty pin ever offered to cyclists. Exact size of cut, perfect frame, seat, handle bars, sprocket, pedals, chain, and all; in silver-plated stamped sheet metal; its novel feature is its wheels, which are of Roman gold, and in place of spokes it is composed of wings like a windmill. They are perfectly balanced, and the slightest breeze sets them whirling like lightning, giving a beautiful effect and producing a pleasant purring relieving the monotony of the ride. "Don't ride alone when you can have company." Postage 1c. Price 10c. Each; Special 98c. Dozen.

MURPHY'S PUZZLE BOX.

Laughable, Amusing, Interesting and Exciting from beginning to end. In size, convenient to be carried in the pocket, and brought forth on each and every occasion. It will please you and will put your friend in good humor. The puzzle consists in putting Murphy's eyes in their right place. The eyes, which are represented by two small shot, persist in rolling all over Murphy's face and when, through careful manipulation, one eye is put in place it trembles in quite a comical manner—but when both eyes have been successfully placed, Murphy's face fairly beams with good humor. Postage 1c. Price 5c. Each; 50c. Doz.

PLANCHETTE, JR.

"Aerial spirits by great Jove designed to be on earth the guardians of mankind; invisible to mortal eyes they go, and mark our actions, good or bad, below." Since the days of the Fox family nothing has appeared which has excited scientific inquiry into the possibilities of actual intercourse between the seen and unseen as did, and still does, the magical, and to some minds the uncanny, Planchette. Under its guidance questions have been answered and tales told so bordering upon actual revelations that one's intellect becomes confused, and for the moment at least it seems possible to enter the secrets of the spirit world. Scientific journals and societies admit that there is an indefinable "something" which controls the actions of this instrument to such an extent that its answers are proved by actual knowledge to have been true. Professor Tyndall frankly says, after the most careful examination, that "the phenomena are inexplicable by any known laws." The present generation have only an indistinct recollection of the days of 1867, when Planchette was read, studied and discussed about nearly every fireside. The instrument is illustrated above, and consists of a movable table bearing a well-sharpened lead pencil in its index point. For an evening's entertaining Planchette proves a diversion both interesting and marvelous, especially as it refuses to act while under certain individuals' touch, and again readily becomes alive when another investigator presses his fingertips upon its responsive mechanism. Planchette Jr. is the same in principle as the larger one, but measures only 5 1/2 inches. Polished hardwood table. Postage 5c. Price 25c. Each; \$2.45 Doz.

This is the greatest wonder of the printer's art—the most ingenious, puzzling and magically changing book to be had. It contains 50 pages of fancy and comic pictures in colors, pages of music, of alphabets, etc. You can take this book, and, turning the pages, show your audience that the book contains only comic pictures. In making all of these changes you turn the leaves from beginning

This new mechanical bank is 3 1/2 inches square, height in front 5 1/2 inches. It is made of sheet metal, an exact imitation of an old time "quarters befo'de wah." With one of these banks you can do a "regular land office business," why? because every one that comes along will want to see the performance, and the talent does not accommodate unless paid, consequently in goes the admission price, every time. The bottom is a coin safe into which all the money drops and remains there until removed by the treasurer of the bank. The metal door with safety key, insuring this. It is wound up from the back. THE MARVELOUS GYROSCOPE.

This top has been for years a "sticker" for scientists and even the most learned cannot satisfactorily account for the wonderful feats it performs in apparently defiance of all laws of gravitation and motion. Our cut shows its capabilities better than we can describe them. It is composed of a neatly decorated wheel of heavy metal on a bright steel axle which is perfectly pivoted inside a bright steel outer ring. The wheel, owing to perfection of its bearings and its

weight turns at high speed, and runs a great while. Without being able to state reasons, we guarantee that this top will spin in all the positions shown in cut, and in almost any other the operator can devise. Sold the world over at 25 cents. Notice our cut. Full directions and pedestal with each. Postage 4c. Price 12c. Each; \$1.20 Doz.

The Telescope Vocophone.

Here is a funny thing; it is figuratively and actually a yard of fun and is capable of being concentrated into very small compass. Suppressed by the Coney Island authorities, because it made so much noise and for this and other reasons now wanted by every one. When collapsed as shown in small cut, it occupies a box 4 in. square; when extended, it is about 3 feet long with a 4-inch mouth; composed of 12 tapered sections. Its construction gives the same astonishing effects in magnifying the power of the voice as the recently invented Microphone by which ordinary tone is increased to that of a giant and carried a mile and over with ease. With it you can speak to the mountain-tops, valleys and forests from your doormat; call the folks to dinner for a mile away and in fact hold long distance conversation with your neighbors in general. Furthermore, each instrument is fitted with a Patent Vocophone mouth-piece which gives a peculiar viend and penetrating quality to the tone and enables you to exactly reproduce the howling of a bull, the roaring of a lion, squeal of a pig, crowing of a rooster—down to the chirrup of a dicky bird. It will imitate perfectly any band instrument from piccolo to bass horn or opera singer from high soprano to basso profundo with all the usual "agony". All told we have not in years offered anything with more merit for amusement and utility than this Telescope Vocophone. Made of special fibre tubing coated with silver and gold leaf ebonized mouth-piece with delicate reed mechanism, not affected by dampness or use. Get one now and let the fun begin! Postage 9c. Price 50c. Each; \$4.95 Doz.

Pocket Watch Purse.

WHISTLING FIG.

You hang him to your watch chain as a charm, and you have not only an odd little ornament, but something of use and value as well. You blew his nose and he emits a shrill squeal. In fact he is an A. No. 1 whistler. Will stop any car except a Broadway cable. Postage 1c. Price 2c. Each; 20c. Doz.

Since the wonderful climbing monkey was produced nothing so attractive in this line has been produced, and this is even better, as it has more action and is more attractive. As the string is pulled,

as shown in cut, the bird flaps its wings with perfect naturalness and really appears (the string being small and almost invisible) to mount up on the air alone to the boy's other hand. The bird is beautifully gotten up in lithographed metal in several colors showing its plumage as in life; measures 7 inches from tail to beak; its wings have a duplex action, each having a skeleton mechanism which works from machinery inside the bird. Here is the "Queen of the Air," Miss Blondin, a beautiful young lady that really walks along a real rope suspended in the air, without any assistance from anyone. She always creates great laughter and applause. The figure is perfectly formed and wears a Bloomer costume—blue skirt, and red and blue trimmed waist, with bare arms, and legs in

tights. By an ingenious mechanism she is made to stand on rope, and is ready to walk the moment you place her on the rope. By adding extra rope she will walk from one room to another, or the whole length of the house without taking her down. This a wonderfully ingenious invention, and Lady Blondin walks just like a real tight-rope walker, her legs and feet moving as if in life. Invalid's Home Healer.

Do you suffer from RHEUMATISM, GOUT, NEURALGIA, NUMBNESS, NERVOUS TROUBLES, WEAKNESS or BLOOD DISORDERS of any kind?

ELECTRICITY is the **BEST KNOWN CURE** for all these ailments and many others, it is **ALWAYS BENEFICIAL** and **NEVER HARMFUL** no matter what the disease or trouble may be.

Ask any authority, "Is Electricity Beneficial for Muscular and Nervous Affections?" The answer will invariably be "Yea."

There are Millions this Dynamo will cure. Many are squandering, not **SINGLE DOLLARS**, but tens, hundreds, and even thousands with Doctors in the vain search for relief. We know how they are buying quack medicines, wearing magnetic belts and other useless devices of avaricious so-called specialists; how they are being scared, bled and fleeced by charlatans and advertising fakes.

Dr. Cutten's Medical Dynamo is the latest and most marvelous invention of the celebrated Dr. E. B. Cutten, one of America's foremost and most successful specialists in modern sciences. Being a Medical [Doctor of

wide experience and an expert in Electro Chemistry, he has, after long and continuous study of the various apparatus, now employed by the Medical World, been successful in evolving a machine of one's unique and scientific, yet most adaptable and efficacious as a means of distributing the electrical currents through the human system in the most beneficial manner. From the large medical coils, magnetic machines and other highly expensive and complicated apparatus ordinarily used for electrical treatment Dr. Cutten has eliminated all the faults and magnified many times the virtues in the invention of this simple little Dynamo.

This Home Health Giver is wonderful on account of its size and low cost, yet generating the effective **DIRECT CURRENT** so essential for the best curative results. The Dynamo requires neither doctors' prescriptions nor expert handler. No chemicals necessary and is always ready for instant use.

The current can be exactly gauged by means of the patent switch, developing as it does a continuous volume, without shock or irritation and suitable for the most delicate organism or strong enough to overpower a giant.

The Dynamo comprises permanent field magnet and armature connected with multiplying gear, giving great speed with slow turning, switch for controlling current and conductor cords attached to electrodes which may be applied to any part of the body. Mounted on polished wood base. Dr. Cutten's Treatise, a work of great value, giving explicit instructions for home electrical treatment free with each dynamo.

Since the Bell patents have expired the public have awakened to the fact that telephones are wonderful savers of time and labor. It has always been our study to fix on the best things of this earth and if possible place them within the reach of all the best people, i. e., the masses—the workers. The object lenses are of fine quality and high power, 1 inch across; sections are of highly-polished seamless brass tubing, fitted at each joint with milled and threaded brass caps, so that all may be readily taken apart. FRENCH ACHROMATIC TELESCOPES.

NO. 1

This useful and beautiful instrument has five lenses, of the best French manufacture. The object lenses are achromatic, that is, convex and concave. High power achromatic telescopes have heretofore sold at prices placing them almost beyond the reach of persons of moderate means. The telescope we now offer is just what the people want, a real philosophical instrument at a low price. It is strongly made and cannot get out of order, but will last a lifetime. The slides and mountings are made of brass, highly polished, the telescope tubes fitting closely into each other. Safety caps of polished brass cover the exposed ends of the instrument, keeping out dampness, and dust when not in use. The main tube or body of the telescope is covered with handsome French morocco, making it altogether a most excellent instrument. The length of the telescope when extended is 16½ inches; when closed, 6 inches; diameter, 1¼ inches. Each telescope is furnished with a strong case. Postage 13c. Price \$2.00 Each.

No. 2 FRENCH ACHROMATIC TELESCOPE.

For those desiring a still larger and more powerful telescope we have one which measures, when extended, 25¼ inches; when closed, 9¼ inches; diameter, 1¼ inches. This is a magnificent glass and is specially adapted for the study of the heavens; thousands of stars invisible to the naked eye being clearly brought to view by the aid of its powerful achromatic lenses. We have placed another large import order which enables us to reduce the price to \$3.60 Each, Sen. by Express.

COMBINATION MICROSCOPE.

It is specially imported from France, and readily sells for one dollar at retail. The cylindrical case is manufactured from highly polished brass, while there are two separate lenses—one at each end of the microscope. The larger glass is a convex magnifier, adapted for examining insects of various kinds, the surface of the skin, the hair, fur or any small articles. It will magnify the hairs on the hands or arms till they resemble large ropes, and it is a most interesting companion. The other lens is exceedingly powerful, and will clearly delineate every small object entirely invisible to the naked eye, such as the animalcules in a drop of water, fishes, feathers and the minutest insects. Thousands of living animalcules can be seen in a single drop of stagnant water. An insect eye is a very beautiful object when seen through this microscope. It is invaluable in detecting adulterations in food, such as flour, tea, coffee, sugar, spices, milk and the fatal triphina spiralis or pork worm. Postage 2c. Special Price 38c. Each; \$2.75 Doz.

highest class; the lens-matic and of the highest frame is of polished cherry, perfectly made; brass fittings; view holder attached to adjustable slide, giving more strength and accuracy than when holder moves on slides. For this use the lenses are given a half turn outward by means of small knobs shown in cut. This changes focus and produces the desired result. Catarrh—a common and dangerous malady when chronic—is liable to consume the frontal bones of the skull, destroy the cartilages of the nose, and undermine and blight every function and faculty of its victim. The breath is offensive; the memory, reasoning powers, sight, hearing and the senses of taste and smell are impaired; the digestive and assimilative functions become disordered and Consumption ensues. HUMPHREYS' MAGNETIC RING.

This is a well-known ring which differs from others in not being continuous but broken, as shown in cut, and therefore having a positive and negative pole, the same as any magnet. Its strength and practicability may be tested with a compass or any article of steel. The record of marvellous cures traceable to this ring probably exceeds that of any other. A ring which is closed or joined together cannot completely distribute magnetism, as is well known by any scientific person, that if there is any current it will keep revolving around the circle and will not depart from itself, thus having no effect. Not so with Professor Humphreys' batteries, for as the current comes to the end of the circle the electricity enters the body at one point and is taken up again at the other, after passing through the body, forming a complete circulation. Regular price \$2.00. Postage 1c. Our Special Price 75c. Each.

OUR MAGNETODE ELECTRIC BELT.

The only humbug about Electric Belts in general is the abnormal price at which they are sold. We have gone thoroughly into the construction of these appliances and have found that there is nothing in the \$10.00 Belts, aside from outward show, which is not duplicated in the cheaper ones, and we have had made under contract, by the most prominent manufacturer in this line, the belt we offer here. Our contract does not allow us to use his name in connection with this Belt, but every one is sold under his absolute guarantee of quality, and, further, that it will effect cures as quickly and radically as any other Belt of all such diseases as Rheumatism, Nervousness, Kidney Diseases, Stomach, Liver and Bowel Troubles, Pains, Paralysis and Weaknesses. It is provided with duplex permanent magnets, which contact directly with body, and electrodes encircling the body and imparting a steady volume of electricity necessary to radical cure. COLUMBIAN ELECTRIC GENERATOR, OR DYNAMO.

This is a wonderful little machine in the line of Electrical goods. Up to date the only portable Electric Generator has been a chemical battery, called Medical Coils; This machine is entirely mechanical and generates a very powerful current depending on the speed with which it is run. Attached to a sewing machine, and run from the large driving wheel it will generate sufficient a current to throw a man down instantly, and for all medical purposes, it gives ample current by hand-power. By belting from the large pulley which is 6 inches across to small on shaft, a speed of several hundred revolutions of Armature per minute is easily attained. This Dynamo is perfectly made and is good for unlimited use. It uses no chemicals, only requiring power. A great instructor for the young and something by which an ingenious boy may demonstrate nearly all of the various powers of electricity by adapting it to running motors, experimenting and furnishing amusement to company. As a remedy for various ills, electricity is well known and this dynamo is destined to supersede all other forms of small generators as it has more power than a \$25.00 chemical generator, costs nothing to run and lasts a life-time. Cannot be mailed.

So we have gotten back to first principles and produced a composition called Stick Mucilage, which for casual use, such as the average person has, beats the liquid in every respect. It is always ready, never dried up or soured; compact, can be carried in vest pocket; strong and quick in its action—much superior to liquid in this respect; economical—no waste whatever. IDEAL PANTS HANGER AND STRETCHER COMBINED.

PATENT APPLIED FOR.

It is a mistaken idea people have, that a stretcher removes baggy knees from pants, not considering that baggy knees come from neglecting the pants, and when once neglected nothing but sponging will do the work, this only for one time, no more.

Pants require more care than a coat; only hanging upside down will preserve their shape, and prevent baggy knees. Pants of every day wear being in the Ideal Hanger through the night while you are resting, will look just as shapely as if just got from the tailor, if you hang them every time when retiring. This can be done in one moment's time, and the same in taking them out, without disturbing suspenders or contents of pockets. Does not force your pants; does not make them longer; simply stretches the pants by their own weight, which you cannot do by any other kind of stretcher. This Ideal Hanger and Stretcher can be taken in your trunk, satchel or pocket, not taking up much room.

There is more dyspepsia cure in "Drummer's Yarns" than in tons of chewing gum.—Dr. L. S. Strong.

DRUMMER'S YARNS

NEW

Fourth Crop. The funniest stories, the wittiest anecdotes, the very best side-splitting Yarns are those that are swapped by the Drummers while "on the road."

Whenever a humorous situation occurs in a Drummer's variegated experience, or is suggested to his vivid imagination, it is carefully stowed away in his memory grip, to be brought out fresh and sparkling for the delectation of his fun-loving associates. The funnyman of the stage is "not in it" with the "Knight of the Grip." Last year's chestnuts don't go with the Drummer. He can give to the end-man in a Minstrel show the big and the little Casino and beat him nineteen points in twenty-one. The Drummer who cannot tell a New Funny Story upon the slightest provocation has no standing in the Guild. Throw two or more of them together in a Pullman car, and the exchange of Witty Yarns is as certain as day after night. The grinning porter forgets his tip, and the hungry listener his dinner. Each is in duty bound to surpass the other, and when once started in his favorite diversion, nothing will stop story-telling Drummer but a stroke of lightning or an order. **HERE THEY ARE!** Not all of them, but the very latest and freshest and wittiest. Caught on the fly by one of the fraternity, who is known from Maine to California, who tells only the best stories himself, and never swaps for a spurious article. They will not set a broken neck, nor protect you against fire, but they will cure most of the ills that visit suffering humanity. Then laugh and grow fat! If you cannot laugh at these stories, we give you up. Your case is a very bad one. Consult your other doctor at once. The many funny engravings are made to fit the Yarns, and some of them would make a horse laugh. This great book contains 112 large pages, size 7x10 inches, with handsome cover. Price 25 cents, postpaid.

"The only complete and trustworthy book of the kind published."

THE RELIABLE COIN AND STAMP GUIDE.

Few people have any idea of the value of old, rare, odd and obsolete coins and stamps. Did you know that a Boston shoemaker sold a collection of **TWENTY THOUSAND DOLLARS?** Did you know that some rare American stamps are worth as high as **SIX HUNDRED DOLLARS each?** It is a fact that the rare 1853 quarter is worth **\$300.00**, the 1823 quarter is worth **\$25.00**, the 1804 silver dollar is worth **\$300.00**, half cents made between 1840 and 1850 are worth **\$3.00 to \$5.00 each**, the large old style copper cents are worth as high as **\$6.00 each**. Some issues of Continental and Confederate bills are rare and valuable as well as certain pieces of fractional currency or "script." Besides these, many rarities in half cents, cents, three-cent pieces, half dimes, dimes, twenty-cent pieces, quarters, half dollars and dollars are worth a big premium over face value. **The Reliable Coin and Stamp Guide** gives accurate information, and you may depend upon it.

While a great many people collect old coins, there is more demand for rare postage and revenue stamps, and some comparatively recent stamps are now scarce. Collections of stamps often sell as high as **A THOUSAND DOLLARS**. revenue stamps from patent medicine bottles, match wrappers, old documents, etc., are in great demand, and are worth from **10 CENTS TO \$10.00 APIECE**. Look over your old letters in the garret and elsewhere; perhaps you may find some rare things. This book gives all particulars, with prices, pictures, etc., and gives addresses of reliable firms who buy them for **SPOT CASH**. No matter if you handle but ten cents' worth of stamps, **EVERYBODY NEEDS IT.** It is worth its weight in gold in any wide-awake person. Boys and girls should read for it and explore attics and cellars in search of old letters, which may contain rare stamps. Who knows? A small fortune may be in your very midst. **Do not write for particulars; do not ask questions; do not send us the coins or stamps, but get the book.** It tells all, where you can sell them at prices given, what they are, what they look like, and why they are rare. **This book gives reliable figures only; no fictitious dates or values whatever.** It is issued under the supervision and authority of the greatest stamp and coin collector and dealer in **North America.** **SATISFACTION GUARANTEED.**

Up-to-Date Love Letters.

This is not a school book that tries to tell those who are enamored how to write love letters. It is a spicy, intensely interesting story about a beautiful young lady and a handsome young man, who met each other in Chicago, and fell desperately in love. The girl lived in Chicago and the lover in New York, to which place he returned shortly after the meeting. Of course they corresponded a great deal. They wrote back and forth; told one another of their great love, and their secrets. After a while they became jealous of each other, and they quarreled in their letters, but finally "made up." He sent her presents, and she wrote back the nicest letters you ever read. All of this correspondence is made public in this book, and never before were such interesting letters published. The book tells how to express ardent love; how to express joy, hatred, jealousy, passion; how to acknowledge a gift; how to make a deep impression on the one you love! It will strike a tender chord in the heart of any one who has ever loved. Love Letters is handsomely bound in cloth and beautifully illustrated. 170 pages. Flexible gilt cloth. Postpaid 50c.

The Art of Ventriloquism.

This great book was written by the celebrated Frederic Maccabe, one of the most famous of the world's ventriloquists. Mr. Maccabe here clearly shows that ventriloquism is not a natural gift, but that by practice and practice it may be acquired by any one, and it is certainly an accomplishment well worth cultivating, for nothing will so amuse and mystify a social gathering as the feats of the ventriloquist. He appears to be a man of a dozen voices. In his natural tone of voice he asks a question, and the answer appears to come from the throat of a little child. Again, we hear the voice of an old man appearing to proceed from the roof of the building, the distant barking of a dog, etc., etc. These wonderful imitations are performed without the slightest movement of the lips, greatly to the astonishment of the audience. Would you not like to acquire this amazing and mystifying accomplishment? You can do so easily and readily by studying the directions contained in this book, which is the best and most complete instructor in the art of ventriloquism ever published. It is a book of 64 large, double-column pages, bound in attractive colored paper covers, and will be sent by mail post-paid upon receipt of only Ten Cents.

THE BLUE HILL BOX KITE.

This marvelous and scientific kite is the invention of H. H. Clayton, Chief Observer at the Blue Hill Observatory, near Boston. It is used at this famous weather station for sending up instruments in making observations at the wonderful height of 9,000 feet or almost two miles. Anybody can fly the Blue Hill Box Kite upon the first trial; laodics and children find a new and fascinating amusement in the sailing of these kites and become experts in a short time. Takes but a second to start it a-flying, and goes up straight from the hand like a bird. Will fly in a moderate breeze, and yet no wind short of a gale is too strong for it. Celebrate the "Fourth of July" by sending up an air ship and floating the Stars and Stripes a thousand feet in the air. Two or more Kites can be attached in tandem fashion, and develop a lifting power which is marvelous. This Kite has undergone many changes in construction since its first introduction last year; the framework is now made of finest selected hard wood, much lighter and stronger, and wound with strongest linen fabric. When not in use can be folded so as to occupy very little space, and to reset it is but a minute's work. Size 30x20x10 inches. Packed ready for Express-acc. Weighs 3 pounds. Sold everywhere at \$1.50 each. Our Price, 65c. Each; Special \$6.40 Dozen.

THE GREAT PHONOGRAM.

It Talks and Sings!

The most extraordinary and marvelous musical instrument of recent years. A clever head backed by a vast amount of money has contrived and constructed a scientific instrument, operated on simple but accurate mechanical principles, which reproduces the latest popular songs, speeches, stories, music by bands, orchestras, &c., in a clear and distinct manner. Its music, both instrumental and vocal, is reproduced with all the beautiful expressions and melody as only the finest bands, orchestras and singers can render them. For home amusement, it has no equal; a child can operate it as well as any one; as there are no complicated parts to get out of order. The music is transmitted to the ear from the regular "Berliner" records, which are made of vulcanized hard rubber, practically indestructible, and can be used over and over again without injuring them. The number of selections you can listen to is unlimited, we have over 1000 in stock at present and are daily adding the latest compositions. Each machine comes in a strong, substantial case with black leatherette cover, size 8x12x3 inches, with one record, hearing tubes for two persons, extra needle points and a complete list of records we have on hand. If you fail to get a Phonogram you throw away a chance of buying a talking machine at \$2.50 which will work as satisfactorily as the \$100.00 ones. Weight 4 pounds.

American Roller Organ.

The American Roller Organ does not belong to the large class of instruments (most of them mere toys) which depend upon a perforated sheet of paper, frail and easily torn, to produce their music. These pins operate upon valve keys made of hard steel; the roller being driven by suitable gearing, which also works the bellows. All the working parts of the instrument are easily accessible, and are made of solid metal, the rollers and keys being mounted on iron castings, and the whole as durable and well made as the best sewing machine. Nothing has been omitted to give this grand instrument its

crowning qualities of EXTREME SIMPLICITY AND DURABILITY. The reeds are of organ size, and their volume of tone, and full sustaining and carrying power, equal that of a full organ. The case is handsomely made of imitation black walnut. We carry in stock over 1,000 tunes in sacred and popular music, to which we are constantly adding. Nearly any tune you may want can be furnished (price 25c. each, \$2.40 doz.; postage 5c.). Regular dealers' price of this organ, \$6.00. Weight, boxed, 15 lbs.; length 16 in.; width 14 in.; height 9 in. Our Cut Price, with 3 Rollers, \$4.50; by Express.

THE INGERSOLL "ROYAL" WATCH.

For Practical Use, as well as appearance, the "Royal" compares with the Old Time Watches much as a modern railway train does with an old-fashioned stage coach. It is designed to fill the ever-increasing demand that our watches have gained on account of their thorough reliability for a "Gentleman's Watch," and is the successful result of great effort and expense in tools and machinery. It is as neat and handsome a watch as can be found anywhere in the market, and is meeting with unqualified praise from all who see it. It is entirely new, and becoming very popular. The movement is the regular American Lever-smallest lantern pinion, quick train, 240 beats to the minute, stem wind and stem set, and runs from 30 to 33 hours without rewinding. It has an antique bow which greatly adds to its beauty. All parts are handsomely finished; the back plate is artistically engraved, giving it a genteel and rich appearance; and the case, which is a beautiful design of fancy pattern, is made from a new metal which is an exact imitation of gold; wears and looks as well and will stand any test that gold will stand. It is non-corrosive and non-tarnishable. Every "Royal" is thoroughly tested, timed, and regulated before it ever leaves our factory and is sold with our guarantee for 1 year to keep accurate time. The enormous output of our manufactory was inadequate to supply the demand for the "Royal" during the past holidays, and proves beyond doubt the popularity and excellence of this watch.

They are the most wonderful of modern productions in quality and price, and are the result of ages of development, focused on one object, having the sole energy and aim of the most complete and perfect factory of its kind in the world. They are purely products of Yankee brains and mechanics—not a particle in their construction being foreign. As introducers of these marvelous watches, we commenced their sale over 3 years ago, since when the entire product reaches into millions. We style ourselves "Watch-makers to the American People," because we make watches of GUARANTEED QUALITY which the MASSES can afford to buy. Whoever supposed a few years ago that a WATCH could be built for a dollar? Not merely a watch, too, but one that would keep accurate time, and be actually more durable than a high-priced one!—one that its manufacturers guarantee more strongly than expensive ones are guaranteed! Yet such a watch we have built and now offer you. How we did it, is a long story and an interesting one; but we can't tell it here. WE DID IT! and you can now participate in the results of this marvelous achievement. Our "Yankee" factory in Waterbury, Conn., is dropping out 2 of these Yankee watches every minute, and our method of selling them is through this medium—our Salesman.

They are not toys because sold at a low price. They are low in price because they are made in large quantities. Each meter is individually calibrated, and marked by hand to insure accuracy. We could print the scales and paste them on, but they would not be accurate. They are calibrated

from instruments of recognized standard make, and in the laboratory where care is taken to avoid errors. Many an electrical experiment has proved a dismal failure at a critical time, on account of insufficient voltage or amperage. This would not occur if the proper instruments were at hand and the current tested. Full directions accompany each instrument, and satisfaction is guaranteed. THE MEGAPHONE.

An instrument to carry and receive the voice to and from a distance of one or two miles, used at Yacht, Horse, Bicycle and Athletic Races, Football Games, Shore Cottage, Farm, Country Home, and any place where the voice cannot be easily heard. The Megaphone consists of a peculiarly constructed cone of light waterproof material. When spoken into it carries the voice with wonderful power and clearness to a great distance in any direction to which the phone is pointed. On the water, shore, or in any open country where there are no obstructions, and no local sounds to interfere, it is not difficult to talk and hear to and fro over a distance of a mile with this instrument, while a loud call or hail can be heard about two miles. Voices and other sounds from a distance, which would otherwise be inaudible, can be heard with great distinctness when using the instrument as a receiver, that is to say, listening at the smaller end while the phone is pointed in the direction from which the sounds proceed. Especially with the larger sizes, the results are wonderful. Sizes given are diameter of mouth as they require special boxing. We charge extra for it as below:

12 in. 50c. Boxing 15c. 36 in. \$3.00, Boxing 35c.
20 in. \$2.00, " 25c. 48 in. \$4.00, " 50c.

LAUGHING CAMERA NO. 1.

This scientific curiosity is of best crystal glass, an optical prism, firmly enclosed in a handsome black paper mache box. At one end is around peephole, with an oblong opening on the opposite side of the box. By placing the eye at the peephole, and reversing the position of the box, back and forth, most extraordinary and amusing effects are produced. All objects can be made to look much longer and narrower or broader and shorter than they are; in fact, so distorted as to create great laughter and fun. This Distorting Mirror, when held in a certain position, will make a person in the same room with you appear 50 rods away and from 15 to 20 feet tall, somewhat resembling a bean pole. By reversing the mirror, the same individual will appear to be about 2 feet in height and as large around as a Wash-tub. Send for one and have some fun.

Price, Postpaid, 10c. Each; \$1.00 Doz.

DEVELINE WHISTLE.

This Whistle is constructed on entirely original (patented) lines, viz: A wheel inside of tube produces the sound as the pressure is applied from mouth. The harder you blow, the faster the wheel revolves attaining a speed of 5000 to 8000 per minute. As speed increases the pitch raises; starting at a very low tone it may be carried up the scale fully four octaves, and controlled accurately by the user. Thus a tune may be played by practice, other variations of the greatest novelty may be produced. As the tone raises it grows into a shriek or wail truly heartrendering. If anything can suggest the infernal regions it is this Develine Whistle. Perfectly constructed and heavily plated. Postage 1c. Price 10c. Each;

AMERICAN STEAM LAUNCH.

\$1.75

Our newest and most satisfactory pattern, modeled after a famous propeller, fitted with a powerful little engine and capable of much greater speed than any other toy launch made. Other manufacturers have been making launches that were gaily painted but utterly useless for running purposes. Our "American" is constructed differently, it is built to move through the water, quicker than any other boat, for a full hour without refueling boiler or lamp. In appearance it outshines the best; the hull is of thin metal, nicely painted, measures 12x4 inches and shows the graceful lines of a fast boat; boiler is entirely of polished brass with ribbed sides; engine is very simple and easily understood, and connected to propeller by strong shaft. A good safe launch, easy to operate and sold with our guarantee to be as represented. Postage 30c. PRICE \$1.75 EACH.

FALSE MUSTACHES AND GOATEES.

Great Reduction in Prices! Fun for the Million!—Here you are boys! Just the thing for a little harmless masquerading. These mustaches are made of the best material, genuine hair, nicely crimped. They have a wire attachment, allowing them to be fastened to or removed from the face with ease, and when worn cannot be easily told from the real production of razor and soap. Boys and young men can have lots of fun by putting them on in a crowd of friends, who will be greatly astonished at the sudden transformation. The goatees are attached to the face with wax, and like the mustaches can be removed and replaced as often as desired. For private theatricals, amateur minstrel shows, charades, tableaux, etc., where different characters are to be represented, these hirsute ornaments will be found invaluable. Our three illustrations show one and the same person, the difference in appearance being caused entirely by wearing our different styles of hair appendages. The first picture shows a beardless youth of sixteen; the second picture, the same youth wearing one of our mustaches; the third with mustache and goatee. Any boy or man can change his personal appearance in the same manner as shown in our illustrations. We furnish our mustaches and goatees in six colors—gray, red, light brown, medium brown, dark brown, and black. In ordering state color desired. Black and brown are the colors usually sold. Postage 1c. each; 2c. dozen. Price of mustaches, 8c. each; five for 35c.; one dozen 60c.; goatees 6c. each; four for 25c.; one dozen, 40c.

THE COLUMBIAN 1,000 SHOT RIFLE.

Shoots 1,000 Shots Without Reloading. Simple, Strong and Durable.

This model is similar in principle to the celebrated Marlin Repeating Rifles, which are sold for \$25.00, it is a new feature in Air Guns, it holds a thousand B. B. shot, and is most simple in its working, it is a gun any one would be proud to carry and own, it shoots with precision and throws a shot for a long distance. All parts are interchangeable and replaced for a few cents; easily taken apart. Walnut stock, enameled frame, nickel barrel, weight 5 lbs. This rifle has been thoroughly overhauled, the more valuable features retained, and entirely new improvements added, making it more easily operated, more accurate, more substantial, possessing more length of stroke of piston, thus securing greater force of the shot. No expense has been spared in securing the highest attainable results, as regarding the foregoing qualities, and the makers having had the experience of years in developing and perfecting this rifle have no hesitancy in making the claim that the Model of 1898 surpasses all previous models. Furthermore: our immense success last season with this rifle enables us to reduce our price materially, in spite of the great improvements. Unavailable. Our 1898 Price \$2.00 Each.

"ATLAS" TARGET RIFLE.

This is a new gun of American make and one of the most important products of recent years—both on account of its cheapness and quality. It has a blued octagon, barrel 22 inches long with perfect blue finish and rifle bore which is guaranteed accurate, fitted with new patent back sight quickly adjustable to every 100 feet up to 700. Its mountings are perfectly made, fitted and case hardened; also its lock, which is Remington Action, provided with shell ejector. It has fine walnut stock with case hardened butt cover. Weight only 4½ lbs. Perfection of stability, compactness and good quality. It shoots No. 22 rim fire cartridges, either short, long or rifle lengths and does such accurate work that its use is by no means confined to youths and is frequently preferred by huntsmen, who find no fault with its working qualities. This is an American made Rifle which for accuracy is guaranteed equal to any. In repeated tests that have been made it has out-shot different expensive Winchester. Barrel is drilled from the best special gun barrel steel at the Remington Arms Factory; has new quick twist (1 in 16½ inches) and blued finish, as fine as any; has automatic shell extractor. No "key-holing" will be found on targets used with this gun. A special and valuable feature is the construction of hammer; it cocks down leaving sight and even bore clear from end to end; in its upward and forward action it locks itself so there is no possibility of recoil. Every gun besides other tests, has a special one for strength, giving it a strain of six times the amount ever used in practice. There is little use in buying cheap imported guns when such as this may be had at our price. Chambered for 22 short or long cartridges; the simplest and cheapest shooting rifle in the world. Unavailable. Regular price \$4.50. Our Price, \$3.70 Each.

Our Fine Cigars

have an established reputation; their good quality and unmatched flavor are appreciated by our customers, as evinced by the enormous sales; and in view of this fact we have added several new brands, reduced the price of the old favorites, and still claim for our line superiority over all others sold at double our price. The big contracts we place with the largest factories are accountable for the exceedingly low figures at which we sell. We want only box trade, and to the end of securing the regular custom of discriminating smokers, we sell samples at nearly box prices. A good cigar cannot be described adequately, it must be smoked to be appreciated. If you will try them we will have your orders. There is scarcely a line of merchandise in which there is so much leakage in "middlemen's profits" as in cigars, resulting in a price to the consumer from 3 to 4 times the cost of manufacture. In buying of us you are assured of but one margin added and that a small one.

THE SMOKER'S TIP.

The neatest recent invention for smokers which if used would save many an incurable disease and often a life; the constant contact of the extremely delicate membrane of the lips with the tobacco, drawing out constantly the nicotine and other impurities from the cigar produces irritation, loosening and rupture of the membrane, ulceration which frequently leads to cancer and blood poisoning. The Smoker's Tip is not a rigid cigar holder, but an elastic tip of pure rubber which fits snugly over the tip of cigar conforming to its shape and not affecting the grip of teeth and lips but giving absolute protection. Postage 1c. on 4. Price 5c. Each; 48c. Doz.

This pipe we have made famous by an immense sale at a wonderfully low price. We got it up at immense expense for dies for stem which is an exact reproduction of a United States Regulation Gun, made in best hard rubber with all the detail of the stock, lock, trigger, etc., worked out with such minuteness as to provoke the greatest admiration for the pipe; on the butt is stamped the words "Army and Navy" in fancy gilt letters. The bowl is of selected rosewood finished in best style. It is a strong and durable pipe which cannot be beaten aside from its novel features. It is worth 50c. in any store and we are

TOBACCO PIPE FILTER.
For Up-to-Date Smokers.

No more foul or clogged stems or bowls to your pipe; no poisonous nicotine. This wonderful little device when placed in the bowl of the pipe, keeps the stem and bottom of the bowl as free from the foul mass after a month's smoking as if the pipe had never been used, as no wet tobacco or nicotine can ever collect in either. The filter is made of specially prepared packing, which prevents the smallest particle of tobacco from getting into the bowl, but in no way interferes with the draught. Its use cools the smoke and saves tobacco enough in a short time to pay its small cost, as there is no wet tobacco to clean out of the bowl every few smokes. The tobacco burns free and clear up to the Filter—no waste. Postage 1c. on 6.

THE MATCHLESS LIGHTER. Automatic Cigarette Case.

This is the Lighter sportsmen and others have patiently waited for. It is a reliable pocket device for lighting cigars, cigarettes and pipes in the wind and storm without the use of matches. It is operated on the same principle as the old time flint and steel, only much more convenient and quicker to light. A slight turn of the wheel on the side sends the sparks flying into the chemically treated fuse, which, instantly ignites. It cannot be blown out. When through using press down top on fuse and it is extinguished. Its mechanism is not excelled by the finest clock work; weighs but 2 ounces, and is far superior to all other lighters, there being no dangling fuse to burn the pockets or greasy substance to soil the clothing. When once used you will never be without it. Half dozen tapers and 1/2 dozen flints, sufficient for 2 years, go with each Lighter. Postage 4c. Price. 72c. Each; \$7.25 Dozen.

To operate after filling, rest the case in your hand, with the "dog's head" facing you; place the thumb just above the head and draw it open as shown in cut, then reverse the movement and the cigarette is "at your service."
