SAMPLES SUBMITTED.

GOOD GOODS AT REASONABLE PRICES.

NO COMMON GOODS SOLD.

Every article we sell, we guarantee to be as represented.

Catalogues of Military and Society Goods Furnished upon Application.

DEAR SIR: We beg to hand you our Price List of Clothing and Furnishings for owners, officers and crews of yachts, and respectfully solicit the favor of your commands.

Any orders you may intrust to us will receive prompt attention, and our best endeavors will be used to give such satisfaction as to lead to a continuance of your favors, and also your recommendation.

Samples of Goods herein mentioned, all of which are of best grade (no common goods sold), will be forwarded upon application for comparison, and we shall be very much pleased to have you call at any time to inspect our stock.

Arrangements made for taking measurements of officers and crews on board their yachts when desired.

Estimates promptly and cheerfully furnished.

We are Manufacturers of everything necessary to completely uniform and equip yacht owners, their officers of the deck, engine room and steward's departments, and crews, and our goods are the acknowledged standard of style and quality.

We make no charge for measuring crews, and wish to impress you with the fact that all officers' uniforms are made to order only, assuring perfect fit.

Call and see our goods.

RATING MARKS FOR SLEEVES.

NEW YORK YACHT CLUB REGULATIONS.

SAILING MASTER.—Two clear anchors, each an inch and a quarter in length, crossed at right angles, with stocks up, in silver. Under this a silver chevron of 115 degrees, point downward, consisting of three bars, each $\frac{3}{16}$ of an inch in width and $\frac{1}{16}$ of an inch apart, arms of chevron to be one inch and a quarter in length. The point of intersection of the anchors to be one inch above centre of upper bar of chevron.

FIRST MATE.—Same device as for Sailing Master, substituting a chevron of two bars.

SECOND MATE.—Same device as First Mate, substituting a chevron of one bar.

CHIEF ENGINEER.—Same device as First Mate, substituting a propeller of three blades, one inch and a quarter in diameter, in red silk, for the crossed anchors.

ASSISTANT ENGINEER.—Same device as for Chief Engineer, substituting a chevron of one bar.

SECOND ASSISTANT ENGINEER.—Same as Assistant Engineer, without chevron.

BOATSWAIN.—A spread eagle, U. S. N. pattern, $2\frac{3}{4}$ inches from tip to tip, in white silk.

QUARTERMASTER.—A ship's wheel of eight spokes, $1\frac{1}{2}$ inches in diameter, worked in white silk on blue, and in blue silk on white cloths.

COXSWAIN.—A pair of crossed oars in white silk, 2 inches in length, worked as per Quartermaster.

230. Same as, No. 229, but quality B. Pair, \$1.00

MEASUREMENT FOR SHOES.

Place the foot on a piece of paper, and draw a pencil line around to give the length, breadth, and natural shape, as in diagram A.

The pencil should be held vertically, or the outline will not represent the foot. The measure to be taken medium tight over the stocking, in inches.

Take the following measures :

1. Ball of foot.
2. Instep.
3. Heel.
4. Ankle.
5. Top.

State the size usually worn. The size and letter indicating the width will usually be found marked on the lining of the old shoe, thus : $\frac{3}{C}$ —meaning size 3, width C.

MEASUREMENT FOR CAP.

To obtain the correct cap size, if the hat you are in the habit of wearing is not marked, take a strip of paper and draw it tightly around the largest part of the head and have the ends just meet, then measure the length of the paper. The figures below will give you the size according to hatters' measure. One-eighth of an inch either way will make no difference.

21 in. around the head will be hat size, $6\frac{5}{8}$		
21 $\frac{1}{2}$	"	" — $6\frac{3}{4}$
21 $\frac{2}{3}$	"	" — $6\frac{1}{2}$
22 $\frac{1}{4}$	"	" — 7
22 $\frac{1}{2}$	"	" — $7\frac{1}{8}$
23	"	" — $7\frac{1}{4}$
23 $\frac{3}{8}$	"	" — $7\frac{3}{8}$
23 $\frac{1}{2}$	"	" — $7\frac{1}{2}$
24	"	" — $7\frac{5}{8}$

DIRECTIONS FOR TAKING CORRECT MEASUREMENTS.

TO TAKE COAT MEASUREMENT.—All coat measures should be taken over vest, snug. Measure from 1 to 2 for length of coat; now raise the arm to a level with the shoulder and bend the forearm at right angles with the body, measuring from centre of back, 3 to 4, and from 3 to 5 for sleeve length. The breast measure, 6, should be taken carefully by placing the tape around the breast, and having it close up under the arms, so that it will go over the largest part of the shoulder blades. Draw the tape measure snugly to get the correct waist measure at 7. **BLOUSE** should be sufficiently long to cover seat.

Measurement for Seaman's Shirt, Guernsey, and Jumper.

Place tape around the body close up under the arms for breast size. Give exact measurements. Due allowance for fullness will be made for shirt. Measure from centre of back to ball of hand for sleeve length.

FOR TROUSERS.—The trousers should be well drawn up, legs straight and slightly parted, body erect. Measure from top of waistband, 1, to bottom of leg, 2. For inseam, measure from crotch 3, to bottom of leg, 4. Waist measure, 5, should be taken over shirt. The other measurements as marked. All trousers will be cut medium width legs, with side pockets, unless otherwise ordered.

Be sure to give height and weight, and whether square or sloping shoulders.

FOR VEST.—Place end of tape at collar button at back of neck, and measure to bottom of front vest to obtain length.

Seamen's Overalls and Trousers.

Measure from crotch to bottom of heel of shoe for length, and around waist over shirt snug.
